

Name of Program	Child Development Permit Project
Description	This project aims to support the professional development of early care and education staff by paying the Child Development Permit application and fingerprint processing fees required to obtain a Child Development Permit from the California Commission on Teacher Credentialing. This project will pay the fees for approximately 3,000 first-time, renewal, and/or upgrade permit applications. Priority will be given to individuals participating in retention incentive programs supported by the CCFC and in the CCFC Training and Retaining Initiative and to those applying for the three higher-level permits (Master Teacher, Site Supervisor, and Program Director).
Administering Agency and Partners	Yosemite Community College District, Child Development Training Consortium (CDTC)
